

@ Dave really liked the flow of our design and thinks it is definitely something they would use as the replacement of the current method.

@They have asked questions about how the chart in OBA form work and they were happy with the response

@They liked our theme change a lot. So, I think we will stick to the U of R theme for the design.

@They liked the export feature for the form

@We have used the tag idea to tag the forms to it is easier to find but never got the chance to present it.

@The overall feedback was very positive and they didn't ask any questions (except one) and mostly talked about how they liked the design.

Next step actions based on the customer's notes:

- 1- Continuing the work on the MVP features (priority: 5/5)
- 2- Set the next customer meeting to ask more questions and get more information for the rest of the project (priority 5/5)
- 3- Plan the second release and other design elements (priority 5/5)

*** The next step is out of the timeline of the course project and has only been mentioned to get a better vision of the rest of the process.
