Erika McCluskey

Problem

The accreditation administrators need a better (more efficient, organized, and centralized) way to manage the accreditation data.

- They currently have to manually write reminder emails to professors one at a time
- The OBA form submission status is a highlighted red cell in Excel (not very reliable)
- Everything is updated/done manually
- No sorting/filtering can really be done

Northstar Customer

From the beginning, we saw the accreditation administrators as being our primary/Northstar customers. Our carryover customers are instructors.

Why?

- Admins are responsible for providing/distributing accreditation data (GA indicators, GAs, OBA forms)
- Admins are responsible for data collection

Demo

Thank you!
